Dear Dave,

I hope you are well.

We are deeply grateful for the grant proposed by Liz Armitage and Charlie Gush, which has been established in memory of their dear friend, Ali Eddy. Ali tragically passed away from metastatic thymic cancer last year, just two weeks after her 51st birthday and only 18 months after her diagnosis. During her illness, she was expertly cared for by Professor Popat and his team. We are honoured to acknowledge Ali as the inspiration behind this grant, and we hope it will stand as a meaningful tribute to her life while contributing to vital research in this field.

Your donation of £5000 will help fund the educational event for healthcare professionals on the management of thymoma and thymic carcinoma, led by Sanjay Popat. The event will take place on Wednesday 10th June 2026 from 10am-4pm. The Royal Marsden is a leading centre for the care and treatment of thymic cancers, Professor Popat will use this event to share his specialist knowledge with clinicians from other hospitals and health centres. Please accept this letter as our official receipt.

As many centres do not have access to the same level of research and expertise in this rare disease, sharing this information is crucial. The event will therefore ensure that more patients across the country are able to receive better care and treatment for thymoma and thymic carcinoma.

Please let me know if you would like any further details.

Thank you for your generous support and I look forward to keeping you updated in due course

Best wishes,
