11<sup>th</sup> June 2025

Dear Mr Beardmore and Mr Gush,

We are incredibly grateful to Penguins Against Cancer for supporting Pancreatic Cancer UK once again this year with a generous gift of £10,000 in memory of Jean Davis, Ron Spedding and Simon Lau. We are so touched by your continued support since 2015 in their memory.

A huge thank you as well to Geraint Thomason and Pat Gush for the nomination this year. Your kind gift will be used towards our research programmes to fund innovative treatments for pancreatic cancer.

Please accept this letter as our official receipt.

This year marks 10 years since your first grant and we are so thankful for this continued partnership. Thanks to your support, every £1 invested in our research programmes over the last 10 years has resulted in £7 of leveraged funding for our researchers. This leverage is incredibly important for the pancreatic cancer research community to continue to drive investment and bring us closer to the vital breakthroughs needed to save more lives.

We also want to congratulate and thank the Penguin Peloton team for the incredible endeavour of cycling 340 miles from Guys Hospital to Guys Hospital via Brittany and Normandy, for which this grant was made possible. What a fantastic achievement.

I look forward to updating you on the impact of your grant and the progress of our research programmes, including Professor George Hanna's ground-breaking work to develop a breath test for pancreatic cancer. In the meantime, if you would like to find out more about any area of our work, please do not hesitate to get in touch.

We are so grateful to the entire Penguins Against Cancer team for supporting Pancreatic Cancer UK over the last 10 years. Thank you for helping us drive forward progress in pancreatic cancer research.

Yours sincerely,

**Sarah Inglis**  
Trusts and Foundations Manager
