Dear David & Charlie

Donation from Penguins Against Cancer

Thank you so much for your extremely generous donation of £3,000 to support the research work of Myeloma UK.

The support of Penguins Against Cancer enables Myeloma UK to fund cutting-edge research, support clinical trials and analyse the care given to patients so we can help people live longer, fuller lives after a myeloma diagnosis.

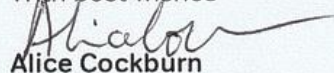

One of our current research projects is the UKMRA Myeloma UK Concept and Access Research Programme. It is the only initiative in the UK focused on the development of early phase myeloma clinical trials. This year, the researchers at CARP have successfully secured funding for the first platform trial in myeloma, which will enable at least three treatments to be evaluated at once. The most effective treatment will then be rapidly identified and prioritised. It's an innovative approach that could have profound consequences on people's lives.

This new kind of trial embodies our vision for the CARP programme. We want to create scientifically sound trials that make the most of available funds and resources and – crucially – are designed with patients in mind. Patients are at the centre of everything we do at Myeloma UK, and our mission has always focused on scientific discovery to find new treatments and improving patient experience and quality of life.

If you have any questions about our work or your donation please do not hesitate to contact me on **0131 230 0768** or email Alice.Cockburn@myeloma.org.uk

Thank you again for your wonderful support. It is donations like yours, invested in innovative new research that make a lasting difference to the lives of myeloma patients across the UK.

With best wishes
