22 April 2016

Leighton Brownrigg was diagnosed with JMML (Juvenile Myelomonocytic Leukemia) at 8 months old a one-in-a-million form of cancer. The only treatment was a bone marrow transplant. Leighton found a donor through Anthony Noland and received his transplant 5 months later.

Our young patients with cancer are some of the sickest children and young people in the region. Some stay with us for up to a year and many more visit the hospital regularly throughout their childhood.

Your support makes a huge difference. Thank You.

Dear Mr Beardmore,

Thousands of children and their families need treatment and care here at Birmingham Children's Hospital every year. Thanks to Penguins Against Cancer, we are able to respond to their individual needs and make sure that being in hospital is as comfortable and reassuring as possible.

**Thank you so much for your recent donation of
£1,000.00**

Your donation has been paid into our Oncology (Ward 15) Trust Fund which is used to support facilities, equipment, research and education on this unit for the benefit of our young patients.

It means so much to our children and their families to know that people are thinking of them.

Please do keep in touch, I have sent a message via your website and I look forward to speaking soon.

With kindest regards

Mandy Smith
