8th March 2022

Dear Dr Man

Thank you for applying for the **2022 Fergus Scholefield Cancer Research Grant**. Your application has been reviewed by our panel of clinicians, and I'm delighted to inform you that you have been successful.

Our team will be in touch with you shortly to arrange transfer of **£5,000** to support your study looking at non-string gene expression profiling for studying the tumour microenvironment for Desmoplastic Small Round Cell Tumours.

The Fergus Scholefield Cancer Research Fund was established in 2016, in memory of a brave young man who, at the tender age of 2, battled through the treatment of his brain tumour with the support of family and friends. Sadly, it was not possible to cure him of the disease and Fergus died before his 3rd birthday. We know that his journey and strength have inspired many more to improve the lives of others and continue the search for better understanding and treatments for cancer. It is intended that this bursary will support researchers to keep pushing the boundaries, and that Fergus's short life will continue to motivate people for many years to come.

Penguins Against Cancer would be grateful if you could acknowledge receipt of this grant in writing.

Under the terms of the award, any publication, presentation or poster produced by the recipient must acknowledge any significant contribution from the Fund and include the Charity's logo (details available from us via email to: penguinsagainstcancer@outlook.com).

The recipient must also inform the Charity about all publications the fund has contributed to.

We wish you every success in your ongoing research.

Yours sincerely

Charlie Beardmore
